

Mazzer Grinders

Franke Coffee Systems North America has set a standard of excellence for commercial espresso grinders in the U.S. Many grinders sold decades ago by Franke Coffee Systems are still in place today with new burrs installed by our service network along the way.

Today, we import the broadest array of commercial espresso grinders available in the U.S., offering three sizes of flat-burr Mazzer grinders, and one conical-burr grinder, the Mazzer Robur.

Our grinder offering fits our philosophy of finding the right solution for each customer's needs and operational capabilities.

Mazzer Robur:

- Maximizes mill surface and reduces the speed of the grind
- Delivers more consistent granular size in the grind
- Reduces heat and friction transferred to coffee during the grind
- Has developed a loyal following after introduction in early 2003

Mazzer Flat Burr Grinder-Dosers - Mini, Super Jolly and Major:

- Come in three sizes and functions (automatic fill, on-off, timer) to fit all types of espresso applications
- Feature cast metal bodies built with durable, high capacity bean hoppers for heavy use
- Allow quick, precise finitely adjustable grind adjustments
- Include large capacity dosers with customizable dosing capability
- Have an unparalleled track record for performance in U.S. espresso operations

Supporting your Mazzer Grinder

Franke Coffee Systems North America and its resellers' espresso program support covers all aspects of machine maintenance, including a 1-800 Customer Help Line, onsite service, and rapid parts order and delivery. We provide the expertise and knowledge to ensure that every espresso machine and grinder we sell operates successfully and consistently, producing better tasting coffee, increasing productivity, and boosting beverage sales.

Mazzer Grinders:

Facts and Figures.
