

EPOCA E

coffeeing the World

EPOCA E

Soft technology

The Epoca E version incorporates hardware that allows results of excellent quality to be obtained in operating the mechanical system and in the preparation of an impeccable espresso.

1 GRID SYSTEM To make cleaning and maintenance easier, Rancilio has equipped all its products with a revolutionary work surface. Support grids come in a scratchproof polymer, with an efficient liquid collection system that keeps the work surface clean and protects cups against unsightly marks left by drops of coffee. The grids can be removed for washing in a dishwasher. Rancilio quality also means attention to details.

ABM.07 (Advanced boiler management). The ABM07 function allows electronic control of the boiler and water system. A specifically designed software system improves the performance of the machine by switching on the heating element when simultaneously brewing espresso, dispensing water and steaming milk.

The machine will stabilize temperature, anticipating usage. The new version features a control that immediately and effectively senses pressure fluctuation. For locations with low power availability, the electronics can be adjusted to reduce power absorption to 2/3 of normal value.

2 3 COLORS The exterior components have new colors and finishes. Red and grey are enhanced by a metallic effect that gives the Epoca a shiny and modern appearance. Polished steel embellishes the various versions, showing the softness of the stylistic forms.

EPOCA E . TECHNICAL FEATURES

Technical Features

independent heat exchangers

electric heating

incorporated volumetric pump

boiler pressure gauge

automatic water level control

housing in stainless steel, base and sides in HDPE and ABS

Endowments, accessories

ENDOWMENTS: 1 filter holder for 2 cups per group, 1 filter holder for 1 cup, 2 steam wands for version with 2 groups, 1 steam wand for version with 1 group, 1 hot water dispenser, coffee tamper, blind filter and measuring scoop.

ACCESSORISES: DP automatic or manual water softener, MD dosing grinder.

Colors

metallic red and metallic grey
