RANCILIO

coffeeing the World

CLASSE 10 S

Essential elegance

The semi-automatic control of this version makes it extremely simple to use and reliable in all situations.

1 SOFT TOUCH The new soft-touch button panel has an ergonomic feature that makes starting and stopping the machine while dispensing extremely comfortable.

2 C-LEVER (Rancilio Patent) The new steam valve with a special control knob and ergonomic design is complete with open-stay and open-close functions. The valve has a very short travel distance, and is operated by rotating it just 25°. Turning it upwards, it opens and remains in this position. Turned downwards, it automatically closes when released. Rapidity, precision and ergonomics: maximum user comfort for daily tasks.

3 GRID SYSTEM To make cleaning and maintenance easier, Rancilio has equipped all its products with a revolutionary work surface. Support grids come in a scratchproof polymer, with an efficient liquid collection system that keeps the work surface clean and protects cups against unsightly marks left by drops of coffee. The grids can be removed for washing in a dishwasher. Rancilio quality also means attention to details.
